SCENT WITH INTENT

HAND Poured, ETHICALLY MADE
SPELLCRAFT & SOY CANDLES

CANDLE CARE & SAFETY:

To get the best results and life from your candle please follow the tips below:

- Allow the wax to melt across the whole container. This will achieve maximum fragrance and an even burn.
- Be careful not to trim your wicks too short as it may affect your ability to relight the candle in future.

Remember a candle is still an open flame and can be a fire hazard if there's anything combustible nearby. Follow the below tips to ensure you enjoy your candle as safely as possible:

- Always burn your candles on an even surface and away from drafts.
- Do not leave burning candles unattended.
- Keep candles out of reach from children or pets.
- Keep candles away from curtains, blinds or flammable liquids.
- Keep your wicks trimmed to avoid large and uncontrollable flames.

ABOUT US:

The idea for Scent with Intent came over lunch early 2014. We expressed how disappointed we were to learn of the use of palm oil in many of our favourite products including food, cosmetics, skin care, and candles.

Then the thought struck. We can make educated choices about the food and skin care products we buy, but; what about candles? How did we know what we were buying was palm oil and cruelty free? How did we know that the soy wax was, in fact, 'pure'? How could we trust products when companies can hide their ingredients under umbrella terms such as 'Vegetable Oil'?

The truth is; we didn't.

Our mission was clear; after extensive research we began to source the most ethically produced ingredients we could find to make our own scented candles.

Not only did we want to have ethical and cruelty free candles to enjoy ourselves but we knew if we were looking for an alternative so were others. So, we're offering consumers another choice.

Scent with Intent is all about purpose and, as the name suggests; intent. Our intent is to be as ethical and cruelty free as possible. If we find a more ethical ingredient to what we already use we'll source it and use it in our products.
